Daftar Isi

TINJAUAN MATA KULIAH ................................................................. ix

MODUL 1: PERANAN DAN FUNGSI AIR SEBAGAI PENYUSUN TUBUH TUMBUHAN .................. 1.1

Kegiatan Belajar 1:
Peran Air sebagai Penyusun Sel Tumbuhan......................................... 1.3
Latihan .................................................................................. 1.33
Rangkuman ........................................................................... 1.34
Tes Formatif 1 ...................................................................... 1.35

Kegiatan Belajar 2:
Proses Penyerapan Air pada Tumbuhan dan Proses Transpirasi.... 1.38
Latihan 1 .............................................................................. 1.60
Rangkuman ........................................................................... 1.61
Tes Formatif 2 ...................................................................... 1.61

KUNCI JAWABAN TES FORMATIF ............................................ 1.64
GLOSARIUM ........................................................................ 1.66
DAFTAR PUSTAKA .................................................................. 1.69

MODUL 2: HARA MINERAL DAN MEKANISME PENYERAPANNYA DALAM TUBUH TUMBUHAN .................. 2.1

Kegiatan Belajar 1:
Hara Esensial Makro dan Mikro pada Tubuh Tumbuhan .............. 2.3
Latihan .................................................................................. 2.15
Rangkuman ........................................................................... 2.16
Tes Formatif 1 ...................................................................... 2.16

Kegiatan Belajar 2:
Peran Fisiologis Unsur Hara pada Tubuh Tumbuhan .............. 2.19
Latihan .................................................................................. 2.33
Rangkuman ........................................................................... 2.34
Tes Formatif 2 ...................................................................... 2.35
Kegiatan Belajar 3:
Mekanisme Penyerapan Ion dan Unsur Hara Mineral .......... 2.38
Latihan ................................................................. 2.55
Rangkuman ............................................................. 2.56
Tes Formatif 3 .......................................................... 2.57

KUNCI JAWABAN TES FORMATIF................................. 2.60
GLOSARIUM .............................................................. 2.62
DAFTAR PUSTAKA .......................................................... 2.66

MODUL 3: FOTOSINTESIS DAN ASIMILASI KARBON PADA TUMBUHAN 3.1
Kegiatan Belajar 1:
Tahapan Fotosintesis dan Mekanisme Kerja Reaksi Fotosintesis .. 3.3
Latihan ......................................................................... 3.29
Rangkuman .................................................................... 3.30
Tes Formatif 1 ............................................................... 3.31

Kegiatan Belajar 2:
Metabolisme Karbohidrat dan Asimilasi Karbon pada Tumbuhan 3.35
Latihan ......................................................................... 3.49
Rangkuman .................................................................... 3.50
Tes Formatif 2 ............................................................... 3.57

Kegiatan Belajar 3:
Asimilasi Karbon pada Tumbuhan C3, C4, dan CAM ............ 3.54
Latihan ......................................................................... 3.63
Rangkuman .................................................................... 3.64
Tes Formatif 3 ............................................................... 3.65

KUNCI JAWABAN TES FORMATIF................................. 3.68
GLOSARIUM .............................................................. 3.70
DAFTAR PUSTAKA .......................................................... 3.74
MODUL 4: TRANSLOKASI FLOEM DAN MEKANISME ASIMILASI UNSUR HARA DALAM TUBUH TUMBUHAN

Kegiatan Belajar 1:
Translokasi dalam Floem ................................................................. 4.4
Latihan ............................................................................................. 4.35
Rangkuman ................................................................................... 4.36
Tes Formatif 1 ............................................................................... 4.37

Kegiatan Belajar 2:
Asimilasi Hara dalam Tumbuhan ..................................................... 4.41
Latihan ............................................................................................. 4.65
Rangkuman ................................................................................... 4.66
Tes Formatif 2 ............................................................................... 4.67

KUNCI JAWABAN TES FORMATIF ....................................................... 4.70
GLOSARIUM .................................................................................. 4.72
DAFTAR PUSTAKA ............................................................................. 4.75

MODUL 5: RESPIRASI DAN FAKTOR-FAKTOR YANG MEMENGARUHI

Kegiatan Belajar 1:
Penjelasan Umum Respirasi Selular, Glikolisis, dan Siklus Krebs 5.3
Latihan ............................................................................................. 5.21
Rangkuman ................................................................................... 5.22
Tes Formatif 1 ............................................................................... 5.23

Kegiatan Belajar 2:
Rantai Respirasi sebagai Bagian Penting dari Proses Pemanenan Energi dalam Respirasi dan Faktor-faktor yang Memengaruhi Respirasi ............................................................................... 5.26
Latihan ............................................................................................. 5.45
Rangkuman ................................................................................... 5.46
Tes Formatif 2 ............................................................................... 5.47
Kegiatan Belajar 3:
Enzim dan Faktor yang Memengaruhi Kerja Enzim dalam Tumbuhan ................................................................. 5.50
Latihan ......................................................................................... 5.58
Rangkuman .............................................................................. 5.59
Tes Formatif 3 ............................................................................. 5.60

KUNCI JAWABAN TES FORMATIF ................................................. 5.63
GLOSARIUM ............................................................................. 5.65
DAFTAR PUSTAKA ..................................................................... 5.69

MODUL 6 : CEKAMAN ABIOTIK DAN MEKANISME ADAPTASI TUMBUHAN (FISIOLOGI STRES) 6.1
Kegiatan Belajar 1:
Fisiologi Stres: Cekaman Air dan Cekaman Garam .............. 6.3
Latihan .......................................................................................... 6.32
Rangkuman .................................................................................. 6.33
Tes Formatif 1 .............................................................................. 6.34

Kegiatan Belajar 2:
Fisiologi Cekaman Suhu ............................................................. 6.37
Latihan .......................................................................................... 6.57
Rangkuman .................................................................................. 6.56
Tes Formatif 2 .............................................................................. 6.57

KUNCI JAWABAN TES FORMATIF ................................................. 6.60
GLOSARIUM ............................................................................. 6.61
DAFTAR PUSTAKA ..................................................................... 6.64
DAFTAR RIWAYAT HIDUP ........................................................... 6.66
